COVID-19 Related Travel Restrictions & Recommendations

The state of New Mexico is committed to mitigating the spread of transmission of COVID-19 by:

- Strongly advising self-isolation for persons travelling into New Mexico from high-risk states. This pertains to anyone travelling by airplane, public transportation, or vehicle.
- Calling on all people – both visitors and returning New Mexicans — to comply with the state's masking and distancing guidelines while in New Mexico, in addition to whatever local guidelines and requirements they may encounter. It is incumbent upon visitors to

Self-Isolation & Self Quarantine Guidelines

Anyone arriving in New Mexico is **recommended** to undertake a self-quarantine period of at least 10 days or for the duration of their stay in the state, whichever is shorter. Self-quarantine is a physical separation from others in a residence or place of lodging.

Anyone arriving in New Mexico is likewise strongly advised to seek out a COVID-19 test at their earliest convenience. Testing locations and availabilities are available at **togethernm.org**.

Travel should be limited to only what is essential for work and family. Non-essential travel raises the risk of spreading and contracting COVID-19 — and enhances risk of New Mexico counties being forced to adopt more restrictive COVID-19 requirements on day-to-day activities — and should be avoided.

The state of New Mexico defines high-risk states and low-risk states as a public service to help advise travelers and returning New Mexicans of the risk of COVID-19 in different states.

High-risk states: High-risk states are those with a 5% positivity rate or greater over a 7-day rolling average, or a positive test rate greater than 80 per 1 million residents.

Lower-risk states: Lower-risk states are those with a 5% positivity rate or lower over a 7-day rolling average and a positive test rate lower than 80 per 1 million residents.

QUARANTINE GUIDANCE:

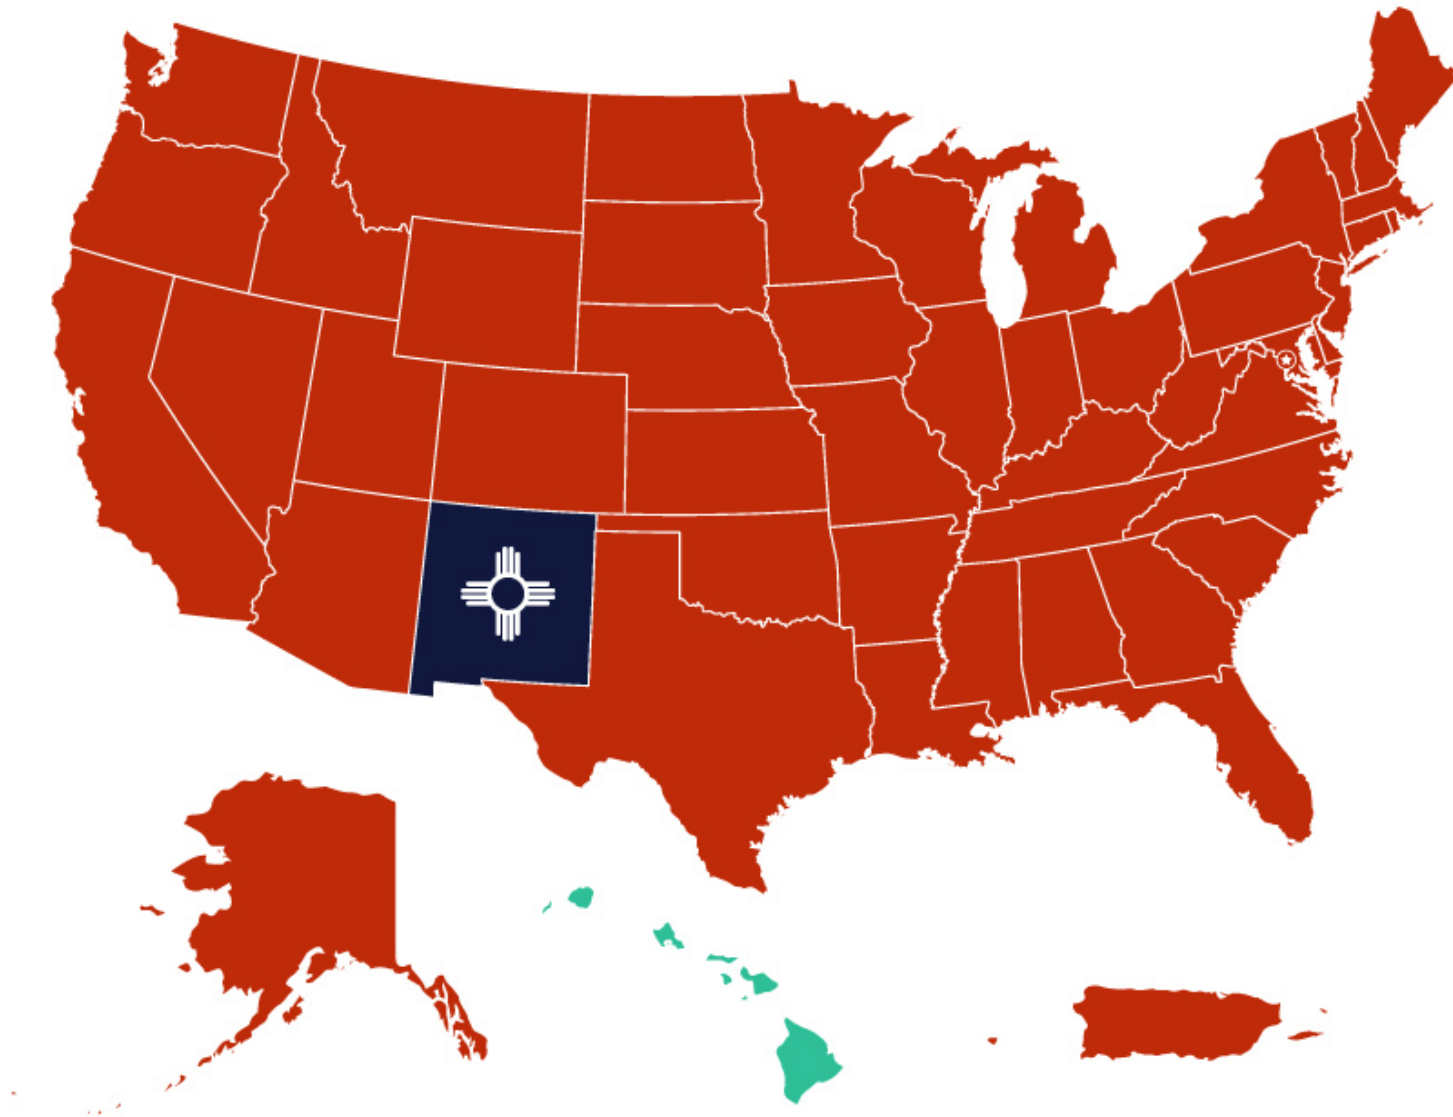

Any person who is self-isolating or self-quarantining:

- Should not leave the residence or place of lodging in which they are self-quarantining only for the purposes of medical care.
- Should not allow others into the residence or place of lodging in which they are quarantined except for those providing medical care, emergency response or other individuals designated by the Department of Health.
- May allow family or household members to visit, but those visitors must then self-quarantine themselves for a period of no less than 10 days, while watching for symptoms for the full 14 days.
