## On Friday, January 15, 2021 Tier 3 Mitigation Freeze was released.

Regions 3 and 5 are back in Phase 4. Regions 1, 2, and 6 Moved to Tier 1. Region 8, 9, 10, and 11 Moved to Tier 2. Regions 4 and 7 Remain in Tier 3

(<https://web.archive.org/web/20210118221310/http://www.dph.illinois.gov/regionmetrics>)

(<https://web.archive.org/web/20210118221310/http://www.dph.illinois.gov/regionmetrics>) Regional Metrics can be found here.

# Illinois Regional COVID-19 Resurgence Criteria

IDPH is monitoring key indicators to identify early but significant increases of COVID-19 transmission in Illinois, potentially signifying resurgence. These indicators are calculated for the 11 Illinois COVID-19 regions. IDPH will monitor if these indicators show an increase in the COVID-19 disease burden with a simultaneous decrease in hospital capacity. These indicators can be used to determine whether additional community mitigation interventions are needed for a region to control the further spread of COVID-19.

Indicators are calculated daily for each region based on the most current, complete data. Each indicator is compared to a pre-established threshold criteria to evaluate the COVID-19 disease burden and hospital resource capacity. By applying the same metrics to each region, IDPH uses a standardized approach to monitor the state as a whole while also monitoring regional trends.

## Regions 3 and 5

Phase 4

## Regions 1, 2, and 6

### Tier 1 Mitigations

### Resurgence Plan

(</web/20210118221310/http://www.dph.illinois.gov/sites/default/files/COVID19/Illinois%20Resurgence%20Mitigation%20Plan%20-20210115.pdf>)

Tier 3 (<https://web.archive.org/web/20210118221310/https://coronavirus.illinois.gov/s/restore-illinois-mitigation-plan>)

### Tier 2

(</web/20210118221310/http://www.dph.illinois.gov/sites/default/files/COVID19/IL%20Tier%202%20Resurgence%20Mitigations%20-%20January%2015%2C%202021%20Update1.pdf>)

### Tier 1

(</web/20210118221310/http://www.dph.illinois.gov/sites/default/files/COVID19/IL%20Tier%201%20Resurgence%20Mitigations%20-%20January%2015%2C%202021%20Update1.pdf>)

IDPH will continue to track the positivity rates and hospital capacity metrics in regions over 14-day monitoring periods to determine if mitigations can be relaxed, if additional mitigations are required, or if current mitigations should remain in place. For Tier 3 mitigation metrics to be relaxed (i.e., move to Tier 2), a region must experience less than 12% test positivity rate (7-day rolling average) for three consecutive days, AND greater than or equal to 20% percent available intensive care unit (ICU) and medical/surgical bed availability (7-day
