KDHE amends travel quarantine list

TOPEKA – The Kansas Department of Health and Environment (KDHE) has amended its travel quarantine list to include the countries of Chile, Colombia, Paraguay, Suriname and Trinidad and Tobago. Several states and countries have been removed from the list, including Maine, Minnesota, all of the counties in Colorado, and the countries of Cabo Verde, Georgia, Lithuania, Netherlands and Sweden. These changes are effective today, June 3.

A comprehensive list of those individuals needing to quarantine includes visitors and Kansans who have:

- Traveled on or after June 3 to Chile, Colombia, Paraguay, Suriname or Trinidad and Tobago.
- Traveled on or after May 20 to the countries of Costa Rica or French Guiana.
- Traveled on or after May 6 to the countries of India, Maldives or Seychelles.
- Traveled on or after April 22 to the countries of Argentina or Bahrain.
- Traveled on or after April 8 to the country of Uruguay.
- Traveled between May 20 and June 3 to the countries of Georgia, Lithuania or the Netherlands.
- Traveled between May 20 and June 3 to Maine or the Colorado counties of Alamosa, Baca, Costilla, Dolores, Mesa, Mineral, Otero, Prowers, Rio Grande, Saguache, Sedgwick or Yuma.
- Traveled between May 6 and June 3 to the Colorado counties of Adams, Arapahoe, Archuleta, Conejos, Crowley, Douglas, El Paso, Elbert, Fremont, Huerfano, Jefferson, Larimer or Pueblo.
- Traveled between May 6 and June 3 to Cabo Verde.
- Traveled between April 22 and June 3 to Minnesota or Sweden.
- Attendance at any out-of-state mass gatherings of 500 or more where individuals do not socially distance (6 feet) and wear a mask.
- Been on a cruise ship or river cruise on or after March 15, 2020.

The travel quarantine period is seven days with a negative test result or 10 days without testing, with release from quarantine on Day 8 and Day 11, respectively. Further information on quarantine periods can be found on KDHE's [website](http://www.kdheks.gov).

For those traveling internationally, the Centers for Disease Control and Prevention (CDC) is requiring testing within three days of flights into the U.S. For further information on this and other requirements, visit their [website](http://www.cdc.gov).

For those who are fully vaccinated (meaning it has been greater than two weeks since they completed their vaccinations) they are not required to quarantine regarding travel if they meet all of the following criteria:

Protect and Improve the Health and Environment of all Kansans

- Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2- dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine).
- Have remained asymptomatic since the travel.

Persons who do not meet the above criteria should continue to follow current quarantine guidance for travel.

Additionally, people with previous COVID-19 disease are not required to quarantine following travel if they meet all of the following criteria:

- Have evidence of a previous infection supported by a positive PCR or antigen test
- Are within 6 months following infection. If an investigation was done documenting the date that symptoms resolved, or the date isolation measures were discontinued for asymptomatic patients, then the 6-month period can start from that end date. If those dates are not available, then the period will start from the date of the positive laboratory test. A serology or antibody test may not be substituted for a laboratory report of a viral diagnostic test.
- Have remained asymptomatic since the travel

Persons who do not meet all three of the above criteria should continue to follow current quarantine guidance for travel.

The travel quarantine list is determined using a formula to evaluate new cases over a two-week period, then adjusted for population size to provide a case rate per 100,000 population. This provides a number that can then be compared to the rate in Kansas. Locations with significantly higher rates -- approximately 3x higher -- are added to the list.

For more information on COVID-19, please visit the KDHE website at www.kdhe.ks.gov/coronavirus.
