

This map displays the 92 counties of Indiana, each labeled with its name and a color-coded letter indicating the response to the 2000 US Census question: 'Did you ever live in a mobile home?'. The colors and letters represent the following categories:

- Blue (B):** Yes, ever lived in a mobile home.
- Yellow (Y):** No, never lived in a mobile home.
- Orange (O):** Did not answer the question.

The map shows a distribution of responses across the state, with blue counties (B) and yellow counties (Y) being the most prevalent. Tipton county is the only orange county (O) shown.
